Volume 8 (1987)

Abdelkader, Mostafa A. *Exact solutions of a generalized nonlinear Lorenz-type system*, 142. *Exact particular solutions of a special Lorenz system*, 264. *Classes and exact chaotic solutions of nonlinear differential equations.* (I), 288. *Classes and exact chaotic solutions of nonlinear differential equations.* II, 308. *Similarity solutions for a nonlinear spherical porous-media equation*, 361. *Exact solutions of a generalization of the Lorenz system*, 442. *Exact chaotic solutions of a second-order nonlinear system*, 516.

Abhyankar, S. *Young tableaux and generalized second fundamental theorem of invariant theory*, 325.

Abhyankar, Shreeram S. and **Kulkarni, Devadatta M.** *Bijection between standard bitableaux and monomials*, 327.

Abian, Alexander. *Construction of algebras in inner product spaces*, 141. *On a fundamental property of A-inductive partially ordered sets*, 257.

Abi-Khuzam, Faruk F. and **Boghossian, Artin B.** *On some geometric inequalities*, 289.

Abikoff, William. *Kleinian groups*, 482.

Abramovich, Yuri. *On Grothendieck's property*, 310. *A supplement to a theorem of T. Andô*, 358.

Abrams, Gene. *On dense subrings of $RFM(R)$*, 163.

Abresch, Uwe and **Gromoll, Detlef.** *On complete manifolds with nonnegative Ricci curvature*, 421.

Adámek, J. and **Rosický, J.** *Reflective subcategories of topological spaces*, 141.

Adams, David R. *Moser estimates for higher order derivatives* (Preliminary report), 62.

Adams, Jeffrey and **Vogan, David.** *Endoscopic groups and duality* (Preliminary report), 221.

Adams, M. E. and **Beazer, R.** *Congruence relations on de Morgan algebras*, 138.

Adams, M. See **Ratiu, T.**

Adler, Roy. *An algorithm for Markov partitions of toral automorphisms* (Preliminary report), 235.

Aftabizadeh, Reza and **Wiener, Joseph.** *Oscillatory and periodic solutions of two first order linear differential equations with piecewise constant delays* (Preliminary report), 60.

Agarwal, A. K. *A note on $n(x, y)$-reflected lattice paths*, 410.

Agarwal, Ashok K. and **Mullen, Gary L.** *Partitions with "$d(a)$ copies of a"*, 19.

Agronsky, S. J., Bruckner, A. M. and **Laczkovich, M.** *Attractor sets for typical continuous functions*, 48.

Ahern, Patrick. *Holomorphic Sobolev functions and transverse curves*, 172.

Ahmadi, Mohammad H. *A generalization of the conjectures of Erdos-Straus and Sierpinski* (Preliminary report), 134.

Akbulut, Selman. *Z_2-framed link theory*, 183.

Akeroyd, John. *Polynomial approximation in the mean with respect to harmonic measure on crescents*, 80.

Aksoy, Asuman and **Nakamura, Masatoshi.** *The approximation numbers $\gamma_n(T)$ and Q-precompactness*, 79.

Aktosun, Tuncay. *Perturbations and stability of the Marchenko inversion method*, 245.

Albrecht, Ulrich. *A-solvable abelian groups*, 41.

Alexander, Kenneth. *Possible cluster sets for the LIL sequence in Banach space* (Preliminary report), 429.

Alexander, Ralph. *Leibniz rules in integral geometry* (Preliminary report), 344.

Alexander, Stephanie B. and **Currier, Robert J.** *Nonnegatively curved hypersurfaces of hyperbolic space* (Preliminary report), 232.

Ali, Ziad R. *Subordinating factors of a Norlund transformation* (Preliminary report), 288. *Subordinating factors of a progressive transformation* (Preliminary report), 308.

Alikhani-Koopaei, Aliasghar. *Extreme path derivatives of a function with respect to a nonporous system of paths*, 48.

Allard, William K. *On a problem of Poincaré*, 89.

Allgower, Eugene. *Numerical approximation of two-dimensional solution manifolds*, 243.

Almgren, Fred. *Optimal isoperimetric inequalities*, 85.

Almgren, Frederick, Browder, William and **Lieb, Elliott.** *Area minimizing integral currents and n-energy minimizing mappings to spheres* (Preliminary report), 89.

Al-Rubaee, Faiz. *The classical result of determining the possible values of the Alexander polynomial*, 237.

Alspach, B., Schellenberg, P. J., Stinson, D. R. and **Wagner, D.** *The Oberwolfach problem and factors of uniform odd length cycles*, 377.

Alspach, Brian, Heinrich, Katherine and **Mohar, Bojan.** *Cycles in block graphs of designs* (Preliminary report), 375.

Alspach, Brian and **Liu, Guizhen.** *Paths and cycles in matroid base graphs* (Preliminary report), 159.

Alster, K., Burke, D. and **Davis, S.** *On $w\Delta$-spaces with G_δ-diagonals*, 360.

Alster, Kazimierz. *On product of a perfect paracompact space and a countable product of scattered paracompact spaces*, 102.

Altman, Mieczyslaw. *A maximal element principle for constraint sets*, 87. *An extremum principle for optimal control* (Preliminary report), 445.

Alvager, T., Graham, G., Hutchison, D. and **Westgard, J.** *An optimized genetic code*, 276.

Amar, M. Ben. *Directional solidification far from threshold*, 502.

Ananth, R. See **Gill, W. N.**

Anastassiou, George A. *Korovkin type inequalities for convex probability measures* (Preliminary report), 70.

Andalafte, Edward. See **Murphy, Grattan.**

Andersen, Per K., Borgan, Ørnulf, Gill, Richard D., and **Keiding, Niels.** *Censoring, filtering and truncation in statistical models for counting processes*, 511.

Anderson, Bruce A. *All non-Abelian groups of order $n, 10 \leq n \leq 32$ are sequenceable*, 6. *Some applications of sequencings to combinatorial arrays* (Preliminary report), 372.

Anderson, D. D. *Star-operations induced by overrings*, 382.
